If you are suffering from chronic pain, fibromyalgia, neuropathy, or regional pain disorder, you may find relief using hyperbaric oxygen therapy (HBOT). Studies have shown that using HBOT delivers healing oxygen to tender points, helps cells maintain or regain normal functioning (at the ATP level), decreases lactic acid, increases blood flow and decreases inflammation. The result is less pain and discomfort.

HBOT is safe and effective and easily accessible at our beautiful wellness center right here in downtown Norfolk.

Prices start at only $150.00 per treatment with payment plans for every budget.

Call us today at 757-452-3934 to schedule a consult or visit our web site at www.hrhyperbarictherapy.com.
