Hyperbaric Oxygen Therapy (HBOT) works at the cellular level to heal wounds. Using HBOT one time right before surgery and then 5 times following surgery, patients have been able to:

- Reduce pain;
- Reduce swelling;
- Reduce bruising;
- Speed up recovery time.

Studies show that HBOT helps to create new blood vessels, which means that new pathways are created to carry the healing oxygen to the damaged tissue.

It has also been proven to reduce inflammation and kill anaerobic bacteria so that you heal faster with less risk of infection.

If you are planning to have surgery, see if HBOT can help you.

HBOT is safe and affordable. Treatments start at only $150.00. Call us today to schedule a consultation at 757-452-3934 and use the code: prepost15.

If you are planning to have cosmetic surgery, consider Hyperbaric Oxygen Therapy to improve your results and recovery.
